STEVEN J. VIK

IT Operations & Security | NOC Monitoring | Incident Response | Python Automation

Renton, WA | 253-315-0162 | steven@stevenjvik.tech | linkedin.com/in/stevenjvik | stevenjvik.tech

PROFESSIONAL SUMMARY

IT operations analyst with 8+ years across enterprise NOC monitoring, incident response, and compliance in regulated environments (CJIS, DISA STIG, NIST 800-53). Most recently monitored 3,000+ endpoints at Sound Transit in a 24/7 IT Operations Center, authoring SOPs, building Python automation that cut MTTR by 40%, and managing 150+ incidents per month via Splunk and SolarWinds. Previously hardened 500+ DoD endpoints at Joint Base Lewis-McChord under DISA STIG baselines. Strong foundation in SIEM operations, endpoint security, compliance frameworks, and scripting for operational tooling.

PROFESSIONAL EXPERIENCE

IT Operations Center Analyst (Contract via Infojini Inc.)

Sound Transit | Seattle, WA | February 2024 - March 2025

- Monitored 3,000+ endpoints across critical transit IT and OT infrastructure in a 24/7 operations center, maintaining 99.9% uptime SLA across 150+ monthly incidents
- Authored standard operating procedures and training documentation for ITOC operations, establishing workflows for incident triage, escalation, and resolution
- Developed Python automation scripts for log correlation and alert validation, reducing mean time to respond by 40%
- Managed endpoint security tooling including CrowdStrike Falcon, Defender for Endpoint, and Entra ID; monitored security events via Splunk and SolarWinds
- Enforced CJIS and NIST 800-53 compliance across IT operations with zero violations during regulatory audits
- Overhauled ServiceNow incident workflows and created playbooks, reducing new analyst onboarding time by 25%

Technology Auditor (Contract via Smart Source Inc.)

TES USA Inc. (Amazon Campus) | Tukwila, WA | July 2023 - January 2024

- Conducted technology assessments across 20+ Amazon facilities, auditing AV systems, Cisco networking equipment, and projector infrastructure for operational readiness
- Built and maintained comprehensive asset inventories, improving tracking accuracy and shortening audit cycles
- Standardized infrastructure documentation across distributed facility portfolios

IT Consultant (Contract via Robert Half / TIG)

Seattle University & City of Medina Police Department | Seattle, WA | March 2020 - March 2021

- Deployed Cisco unified communications infrastructure supporting COVID-19 continuity for 200+ faculty, staff, and students
- Enforced CJIS endpoint security standards, implementing access controls and audit logging for sensitive data
- Developed incident response playbooks and streamlined SolarWinds monitoring, improving operational efficiency by 20%

IT Security Specialist (Contract via TEKsystems)

Joint Base Lewis-McChord | Tacoma, WA | March 2017 - March 2018

- Deployed DISA STIG-compliant Windows 10 systems across 500+ DoD endpoints, reducing unauthorized access incidents by 25%
- Conducted vulnerability assessments using Nessus and DoD-approved tooling, improving remediation throughput by 35%
- Deployed Splunk for centralized log aggregation and threat hunting
- Maintained 100% audit compliance with DoD security assessments

IT Support Specialist

Xerox Technology Services | Kent, WA | December 2013 - March 2017

- Delivered Tier 1-2 endpoint support across a large enterprise environment over a multi-year tenure
- Managed Active Directory user accounts, group policies, and access controls
- Enforced endpoint security policies including patch management, antivirus deployment, and device hardening
- Supported Windows Server infrastructure, network troubleshooting, and service desk SLAs

TECHNICAL SKILLS

Monitoring & Security Tools: Splunk, SolarWinds, Blackrock3, CrowdStrike Falcon, Defender for Endpoint, Nessus, ServiceNow

Endpoint & Identity: CrowdStrike Falcon, Defender for Endpoint, Entra ID, Active Directory, Group Policy

Systems & Infrastructure: Windows Server (2012-2022), Linux (Ubuntu, CentOS), VMware ESXi, Proxmox VE

Network: Cisco routers/switches, Cisco Unified Communications, VPN, DNS, DHCP, TCP/IP

Scripting & Automation: Python, PowerShell, Bash, SQL, Splunk SPL

Compliance Frameworks: NIST 800-53, NIST CSF, CJIS, DISA STIG, HIPAA, ITIL

HOME LAB & PROJECTS

SJVIK Labs - Enterprise Infrastructure Lab

2024 - Present

- Built and maintain a 3-node Proxmox hypervisor cluster with 10+ LXC containers for infrastructure automation and security operations practice
- Deployed monitoring stack (Grafana, Prometheus) with alerting, automated nightly backups with off-site replication, and git-versioned state documentation
- Security hardening: key-only SSH, container isolation, private DNS, Tailscale VPN, defense-in-depth architecture
- Built Python automation for infrastructure health reporting, job tracking, and operational tooling

CERTIFICATIONS

CompTIA Security+ (SY0-701) | CompTIA Network+ | CompTIA A+ | ITIL Foundation | Linux Essentials (LPI) | CJIS Level 4 | Google Cybersecurity Professional Certificate | Google IT Support Professional Certificate

EDUCATION

B.S. Cybersecurity & Information Assurance (Coursework completed, on pause)

Western Governors University

Cybersecurity & Forensics Coursework

Highline College
